

1. Presentation & Features

Thank you for choosing the Janaa JAX3™ Work Tent, designed to meet the needs of professionals requiring efficiency and reliability in outdoor environments. **The Oxford cloth with PU coating provides excellent weather protection while allowing optimal daylight penetration.** The fiberglass structure gives the Janaa JAX3™ a unique combination of flexibility, strength, and lightness, **making it ideal for frequent professional use.**

Tent dimensions: 5.9 x 5.9 x 7.2 ft

Dimensions with carrying bag: 4,4 x 0,66 x 0,62 ft

Weight : 18,5 lb

Package contents : One tent - One carrying bag - Anchoring stakes.

2. Use and Safety

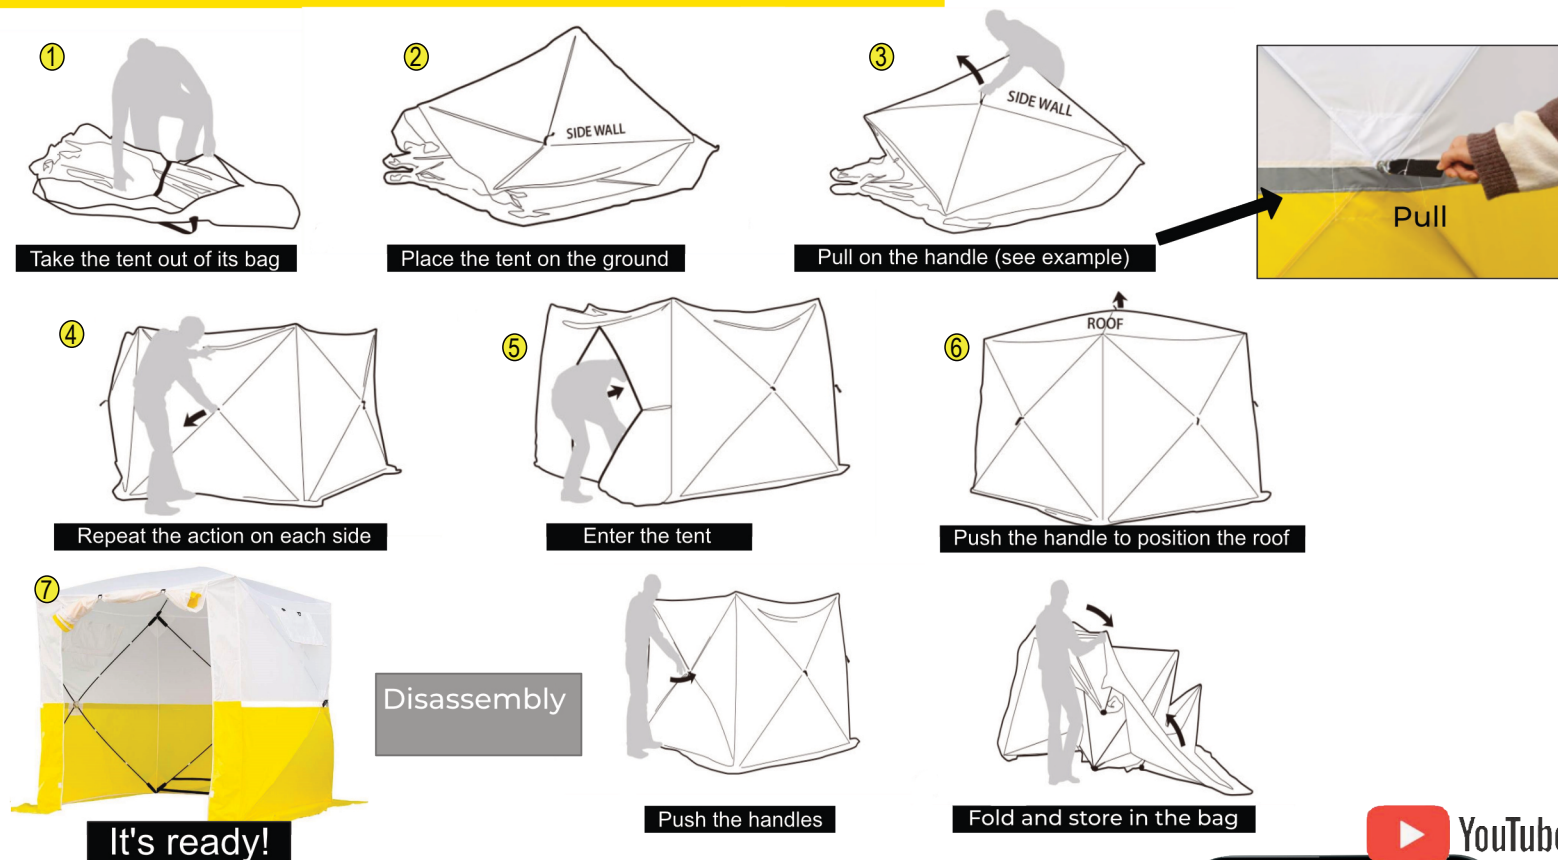

- Preliminary Inspection:** Before each use, check the condition of the tent, especially the fabric and the fiberglass structure, to ensure there are no damages or signs of wear.
- Proximity to Heat Sources:** Do not set up the tent near open flames or intense heat sources. Although the fabric is treated to be fire-resistant, direct exposure to fire should be avoided.
- Managing Windy Conditions:** In case of strong winds, it is advised to reinforce the tent with additional anchoring to prevent any risk of damage or injury. If you are using it on concrete, you can:

1: Use wind ropes by attaching the tent to fixed points in the surrounding area.

2 : Use weights at the 4 corners of the tent to ensure it remains stable.

3. Assembly

Assistance

For any assistance regarding the installation, use, or maintenance of your Janaa JAX3™ Work Tent, our support team is at your disposal. Do not hesitate to contact us by email: contact@janaa.co
